## 01 PROFILE

Third-year Instructional Technologies student specializing in **UX/UI design** and front-end development. I pair creativity with analytical thinking to craft clear, pixel-perfect experiences grounded in design systems and accelerated by AI.

## 02 SKILLS

|                |                                                                                              |              |                                                                                 |
|----------------|----------------------------------------------------------------------------------------------|--------------|---------------------------------------------------------------------------------|
| <b>DESIGN</b>  | Figma, Illustrator, Photoshop, Wireframing, UI Design, UX Flows, Prototyping, Design Systems | <b>AI</b>    | Generative AI for ideation, visual exploration, content & workflow acceleration |
| <b>DEVELOP</b> | HTML, CSS, JavaScript, C#, Unity, SQL                                                        | <b>TOOLS</b> | Rider, Postman, Valentina Studio, Articulate 360, Visual Studio                 |

## 03 SELECTED WORK

### AI Sales Solution for Cognyte

UX · AI WORKFLOWS

A "safe-space" UI and AI-driven workflows inside Salesforce that turn manual reporting into a proactive tool, lifting adoption and reducing friction for reps and managers.

[REPS ↗](#) / [MANAGERS ↗](#)

### UI/UX Designer Pasta Maker Companion App

UX · FIGMA PROTOTYPE

A complete interactive prototype for a smart pasta-maker mobile app, guiding users through the preparation process with interactive tools and an accessible UX.

[FIGMA PROTOTYPE ↗](#)

### Interactive Game Platform & Editor

UNITY · C# · UI

A full ecosystem (client, server, editor) with a custom level editor and all UI assets designed from scratch for an intuitive content-creation experience.

[LIVE GAME ↗](#)

### MushBot, AI Mushroom Identification

UX · JAVASCRIPT · API

A web app with dynamic UX, smart safety-alert logic and an automatic recipe generator for edible species, powered by the Kindwise and Wikipedia APIs.

[LIVE APP ↗](#)

### Reservists Support Platform

UX · HTML · CSS · JS

A responsive platform for wartime-affected businesses, with simple registration forms and a clearer information hierarchy designed for users under stress.

[LIVE PLATFORM ↗](#)

### AI Instructional Development Agent

CAPSTONE · IN PROGRESS

Defining the architecture and user flow for a "super-agent" that automates instructional design with LLMs, with user research on optimizing designer and AI interaction.

## 04 EXPERIENCE & SERVICE

|                    |                                                                                                                                                             |              |                                                                                                                                                                 |
